Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 6, 8, 10, 15-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Parentheses in claims are indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-5 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 60141693

The patent teaches mixing the same ingredients as a fertilizer composition.

4. Claims 1-5 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 52068715

The patent teaches combining ammonium sulfate and polyacrylamide.

5. Claims 1-5 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cox et al., Oct. 1998, and Exacto, Dec. 2000.

Both references (see PTO Form 1449-IDS) disclose Polytex. DC...AMS products that are described as ammonium sulfate impregnated by polyacrylamide. Note that the step of Claim 12 is inherent since it involves only mixing the 2 ingredients.

6. Claims 1-5 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Schapira et al (US Patent 5472476).

Schapira et al disclose a composition containing polyacrylamide and ammonium sulfate mixed together. By combining the two, the limitations of Claim 1 are made inherent. See Claim 8 in particular.

7. Claims 1-5 and 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Rose et al. (US Patent 6288010).

The patent teaches a composition containing ammonium sulfate and polyacrylamide. See Col. 8, lines 39+ and the claims.

8. Claims 1-6 and 8-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Brigance et al. (US Patent 6423109).

Patentees teach combining ammonium sulfate and polyacrylamide, silicone and clay. See claims 1-2, 11-12.

Prior Art

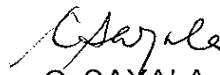

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Volgas et al. (US 2001/0034304) teaches that (as of filing date 1/21/2000) a product on the market already contains ammonium sulfate, polyacrylamide and silicone. See Col. 1, para [0003] and para [0005]
